CL 105 Lab Schedule: http://www.cs.uregina.ca/Links/class-info/301/

Lab Operation

- Lab seminars and exercises are complementary to classroom teaching.
- Lab work focuses on practical hands on experience.
- Please come to your scheduled lab section.
- Lab attendance will be recorded.
- Lab notes are online: http://www.cs.uregina.ca/Links/class-info/301/
- It is highly recommend that you read the materials before you come to the corresponding labs.
- The lab instructor gives a 20 – 40 minute pre-lab talk/conference to highlight or demonstrate the major points at the beginning of each lab session. Sometimes it could be longer depending on the contents of a lab.
- You are expected to read on your own to become aware of all the details given in the online lab notes.

Lab Marking

The mark for each lab can be different from the others. The class instructor decides the weight of labs for the class final mark. You are required to do your lab assignments. There is no lab test for this class.

Students will hand in their lab assignments at the beginning of the next lab. In turn, the previous assignment that has been marked will be returned. Some labs may have an electronic submission or an in-lab demo. I will let you know at the time.

You need to use a cover page for your lab assignments including your name, student number, lab section, and lab number. See the next page for a sample cover.
